Judgment Against Judge Lynch-Uncle Sam's Water Bill-A Pier Broken Down-Detectives on the Wing-Miscollaneous It ms.

The Brooklyn police will shortly be increased, the present strength of the force being numerically in-

Officer Alfred J. Nash, of the Fifth precinct, was cismissed the force by the Commissioners yesterday for being intextented and of post.

Furs valued at \$173 were feloniously removed from the store window of Mr. D. Walmolds, No. 141 Fulton street, on Thursday evening last. The regue

Mary Rorke, a child eight years of age, was fatally barned by her clothing catching fire from the stove at her parents' residence, in Lewis street, near Greene avenue, on Thursday night.

No action has yet been taken by the Board of Fire

Commissioners towards the appointment of a chief engineer in place of John Cumungham, promoted by the Board of Supervisors to be keeper of the Penitentiary. Detectives are "on the wing" for a "dapper little

man" who has been going among the residents of Brooklyn representing himself to be a Custom House officer and collecting money for assignments of goods nover made. The Mr. Dunn arrested on election day by Deputy

supposed repeater was not Mr. James Dunn, Alderman elect from the Sixth ward, as was erroneously reported in yesterday's Herald.

Marshal Shaurman for interfering in the case of a

Sheriff upon a judgment against him granted by the Olty Court in an action brought by William Williams, when damages in the sum of \$5,000 were accorded by the verdict of the jury. He was required to give sureties in the sum of \$20,000. The pier foot of Pacific street gave way on Friday morning, ewing to the heavy weight of flour tiered upon it. The barrels of "fine family" and other brands stored on the pier rolled off into the river one after another, until between four hundred and five hundred barrels of four were after in the briny waters of the East river. The loss to the various owners amounts to \$5,000.

At an early hour yesterday merning the residence of Mr. Daniel P. Dorrian, No. 84 North First street. Williamsburg, was entered by sneak thieves, who succeeded in getting away with a small gold watch belonging to hiss borrian, a quantity of jewelry be-lenging to hiss borrian and \$55 in money and vari-ous strictes of wearing apparet belonging to Mr. Dorrian. At about the same time the residence of Mr. Michael Dowd, \$50 Second street, was robbed of clothing valued at \$70.

ing for some time past between the Water Commissloners and the United States Marine officials at the Barracks as to the settlement of a bill due by the government for water used at the Barracks, and for which Colonel Broome, the commandant, was re-luctant to settle. The Board of Water Commissioners at their meeting yesterday afternoon were reconcied by the assurance of United States District Attorney Tracy to the effect that the bill should be paid, and for the future the amounts due should be paid, and for the future the amounts due should be liquidated by Uncle Sam according to the indications of the meters which will be placed on the Barrack hydrants.

THE WILLIAMSBURG DISPENSARY.

It appears from a report submitted to the Trustees Williamsburg Dispensary by Dr. Biram P. surgical treatment at that institution during the surgical treatment at that institution curing the past month. Of these 217 were natives of the United States, 811 of Ireland, 23 of England, 53 of Germany and 3 of France. The principal diseases treated were:—Nervous, 27; skin, 54; head, 26; abdomen, 124; rheumatism, 23; eye and ear, 20; heart, lungs and throat, 71; levers, 81; urnary, 16; abscesses, 7; minor surgery, 73; vaccinated, 77. Police Presautions Against a Riot-The Origin of the Strike as Stated by the Officials of the Road-A Different Version by the

About four o'clock yesterday afternoon all the police captains on the east side were summoned before Superintendent Kelso and informed that there was danger of an attack by the discharged employes of the road upon the new hands this morning.

of the road upon the new hands this morning. They were instructed to turn out a sufficient force of men to escort the cars through the suspected preclucts and protect the employes of the road against any riotous demenstrations that may be made.

A Herald reporter called yesterday evening upon a Mr. Tucker, who is in some efficial capacity connected with the road. This individual felt rather "sore" about the press not bolstering up the rathroad managers in their proceedings against the employes. He condescended, however, to make the following statement:—The strike originated in the following statement:—The strike originated in the following statement:—The strike originated in the collowing statement drivers for disorderly conduct and for injuring the horses. The arivers domanded that the discharged men should be reinstated, which he refused. He says the greater part of the drivers did not wish to strike at all, but were forced to it through the pressure brought upon them by outside parties—whom he would not mane—and by intimidation. He did not think there will be a riot, and the cars, he said, will run very seon—as soon as the requisite number of men can be got together—all the former drivers having been paid off and discharged.

The reporter obtained a different version of the

requisite mimor of men can be got together—all the former drivers having been paid of and discharged.

The reporter obtained a different version of the story from several drivers, who set forth their grievances as follows:—They were promised \$2 50 on Sundays for two trips to Central Park, but instead of that they were made to run three trips at the reduced pay of \$2 25. Seven drivers have been dismissed without cause, except, perhaps, for having been connected with the former strike. They demand that these men should be reinstated and the promises which were made to them be fulfilled. The strike was undertaken unanimously; they are organized and supported by the Pirst avenue Car Drivers' Society, and there is no lack of funds, which flow in from all sides; they can therefore afford to wait. They deny any intention to create a riol or to use violence against any new drivers that may run the road. A committee which they had appointed waited upon the president of the railroad, but they "ere "nsuited and withdrew. In conclusion they "agged to be given "a show" in the Herald.

A "GRAND ROUNDS" OFTHAGE.

Beating and Kicking a Servant. Commissioner Manierre yesterday morning heard evidence in about forty complaints against officers. Patrolmen Lynch, of the Eighteenth, and Kenneds of the Fifteenth, were tried for gross intoxication the evidence showing that they were intoxicated. Grand Roundsman Gladding, now of the Fifteenth precinct, was charged with improper conduct, on

street. Her affidavit says:— On the 3d instant, at about half-past twelve o'clock in the morning. I went to the hall door for the pur-

complaint of a servant girl employed at 108 Bleecker

on the 3d instant, at about nair-past twelve o'clock in the morning, I went to the hall deor for the purpose of locking it; a man, in company with a female, was standing there; I have since learned that his name was Roundsman William H. Gladding; I told him to go away, as I wanted to lock the door; he refused; I said I would call an olicer, when he said he was one; I attempted to close the door, when he shoved it open and stepped inside, and, placing his hands on my shoulder, gave me a violent push, throwing me dewn, at the same time kicking me three times; I got up and went out, me ta gentleman and asked for the officer on post. Gladding followed me and threatened to arrest me; the officer on post came up, when Gladding made a charge of discretely conduct against me, which was not entertained at the station house.

Mr. Loe, of the Central Office telegraph room, testified that he was in the neighborhood and saw the officer pushing and abusing the girl. The officer on the post testified that the woman was bleeding.

Mr. Manierre teok eccasion to rebuke Gladding, and declared that there must be some truth in the reports of the press that some of the grand roundsmen were in the nabit of leading about disreputable houses, and for this reason the Board had aboished the squad. Gladding denied most emphatically that he had kicked or beaten the woman. The evidence was referred to the Board.

THE TOTAL ECLIPSE AND THE TIDAL WAVE.—The papers have lately given currency to sundry bits of nonsense, said to have emanated from astronomers or men of science, reating to the approaching total sclipse on the 22d of December, 1870. It is said that the sun, moon, Mercury, Venus, Jupiter, Uranus and the carth being nearly in a right line at the time of the eclipse, will produce earthquakes, tidal waves, storms, hurricases and cyclones. One distinguished gentleman to whom these sentiments have been aitributed has thought it worth while to deny ever taxing given currency to such nonsense; and of those who really entertain any such opinions—if these are any such out of Bediam—a distinguished astronomer recently remarked that they evidently belonged to a class of whom it is often said it never will be extinct.—Boston Traveller, Nov. 7.

FINANCIAL AND COMMERCIAL

FRIDAT, NOV. 11—6 P. M. On 'Change to-day there was an improved tone to the markets. Wheat was firm on diminished receipts, with a good demand on home account and for export. Cotton sympathized with the advance in gold, and was higher and in demand at the im-

provement. New York now watches London so closely that any commotion in the financial situation at the latter point is quickly redected here. Yesterday the "bulls" in the Gold Room started a number of false reports and began bidding gold up. They announced the raising of the Bank of England rate of discount, when that institution was the gainer of about half a million dollars in bullion in the weekly exhibit of Thursday morning, and, therefore, more likely to lower than advance the rate. They also re ported excitement and depression at the London Stock Exchange, when the market was really quiet and stealy. By one of those curious freaks of chance which sometimes get speculators out of diffculties they were only anticipating the truth in the second rumor above referred to, for the London Stock Exchange did become excited to-day very suddenly over a report that Austria had formed an alliance with France against Prussia and that an endless series of political and hostile complications was looming up in the future of Europe. The effect on the funds was a decline to 93 for consols, while American five-twenties fell off to 88% a 89. It is barely possible that the report about Austria is made out of whole cloth. In the first place, it is very improbable. In the next, the science of speculation has been brought to such perfection, and its machinery extended with so much elaboration of detail, that it is not impossible the cliques in Wall street have imposed on the credu-lity of London by starting a Yankee hoax in its very midst, for the purposes of furthering some design here. It will not have been the first time that the cliques have worked the London market to effect movements which should find a sympathetic parallei this side of the Atlantic. Erie, Illinois Central, Northwest preferred and United States five-twenties have been operated upon successfully in this way. It is a singular coincidence that just at the moment the cliques are "milking" Wall street in stocks and gold we should have this inflammatory intelligence from Europe. The pools sold gold short at 114 a 115. and by rendering the cash gold scarce kept the outsiders from seiling "short." At the same time they were buying stocks. Now they have covered their gold and sold their stocks. The programme requires that they should get gold up again and stocks down, foreseeing, as they do, the incvitable destiny of both this winter, when money becomes a drug in the market, and gold, under the disbursements of the Treasury, falls to within a few per cent of par. Even if austria has formed an alliance with France, and the war is to spread over all Europe, so much the better for this country. Capital will again come here, and in such a stream as to possibly depress gold to par. Yesterday morning, after the rupture the armistice negotiations, the Bank of England showed a gain in builton. The state ments for several weeks immediately preceding show a loss of specie. What is the inference? Is it not that with the prolongation of the war the money of the Continent is drifting to London? The bank begins to lose specie when peace is mooted and an armistice almost agreed upon. The bank gains in specie when the war is renewed. Of the speculative character of the movement in the Gold Room an estimate may be formed when the loan market is observed to be manipulated in the interest of the cliques who have commenced to make gold scarce, that they may have all the selling to themselves The rate opened at two per cent for carrying, but they bid it up to 1-64 a 1-32 for borrowing for to morrow. MONEY EASY. The supply of funds available for call loans con tinues abandant, and six per cent is becoming the exceptional rate, the majority of transactions occurring at five per cent on stock collaterals, with four and five as the rates on government securities. There is also more movement in discounts outside of the banks, and the street is quite bare of strictly prime paper, the offerings having been suddenly ab-

Foreign exchange was dull and irregular, opening weak but closing rather firm at 100% a 100% for prime bankons' sixty day sterling and 109% a 109% for sight bills.

The government bond market, under the neutralizing effects of the advance in gold and the decline in London, was steady. Late this evening the more impressionable '67's fell off a fraction and closed weak. STOCKS UNSETTLED AND WEAK. The stock market disappointed the cliques by opening buoyant on the discovery of the false news circulated yesterday to break prices. During most of the day it was steady, but on showing strength was showered with stocks. It is now undergoing "milking" process, correlatively with the gold market, and is likely to show an alternation of strength and weakness varied as the weather in April. These violent fluctuations are attracting a more general outside interest and inducing enlarged activity, much to the satisfaction of the brokers and speculative operators, whe prefer rapid "turns" to the dull monotony of a steady or quiet market. There is likely to be a glut of money here this winter, such as will afford unusual facilities for speculation, while the next session of Congress, in dealing with the financial question, will furnish a thousand and one pretexts for speculative movements.  MONEY AND TRADE AT THE WEST.

The Chicago Tribune of resterday says:—

The local money market is steadily growing easier. Money is also mere plonty in the country. Merchants are collecting satisfactorily there, and their deposits here are consequently increasing. The deposits of country banks with their correspondents here are increasing. The demand for money generally has diminished, and temperarily everything seems to indicate further progress towards ease. There is now a liberal flow of currency from the country to this city, which, coupled with the falling off in grain receipts, indicates that the remainder of the grain crep will probably be held, to a larger extent, in the country for higher prices. Exchange is growing scarcer, showing that the shipments of grain from here eastward are falling off. Some of our banks that have been unable to get a supply of exchange otherwise are shipping currency to New York for that purpose, it will thus be seen that as between this city and New York, the general features are a cessation of crop mevements and a tendency of money to flow back toward the financial centures, where it will make money easy and encourage speculation.

THE MURDER AT DAWSON, GA.

The Circus Difficulty at Dawson, Ga.-Two Men Killed and a Lady Wounded by Drunken Ruthans in a Quarrel with the

Bourkeeper.

From the Macon (Ga.) Journal, Nov. 4.1

At an early hour yesterday rumors were rife upon the streets that a fixtal afray had occurred at Dawy as a believe a fixed afray had occurred at Dawy as a believe and colonel almost more than a fixtal afray had occurred at Dawy killed and colonel almost more and menageric, in which a citizen had been in analy killed and colonel almost more in the day a despatch was received by the wife of a gentleman connected with the company stating that the Colonel was wounded and could not possibly recover, but giving no further particulars. Still later in the evening a second despatch was received, stating that Colonel Ames had ided of his wounds. From a gentleman friend who left Dawson yester day morning, on the train bound for this city, we are indebted for the following particulars of the coccurrence—at the afternion performance of the company four brothers of the name of Kelly, with three other men, named Howard, Guss Sasser and all rather the worse for liquor, got into a difficulty with the doorkceper, drew their repeaters and all rather the worse for liquor, got into a difficulty with the doorkceper, drew their repeaters and commenced with the cross of the control of the company four brothers of the family are invited occurrence—at the afternion performance of the company four brothers of the family are invited to a commence with the cross of the case of the control of the control of the definition of the man of the properties of the case of the control of the cont

No weapons are said to have been drawn or used by any one connected with the circus, though they would have been perfectly justlied in so doing. Coloned Ames was conveyed to the readence of one of the citizens of Dawson, the best medical aid obtained, and, though everything possible was done by his medical attendants, yet he slowly sank into the ley embraces of death. Thus has a good man been ruthlessly murdered by a band of desperadoes, who are said to be the same fellows who not long since came near precipitating a bloody émeute between the white and colored races in that vicinity. Judge Howell, who was in Dawson at the time, promptly ordered the arrest of the wretches, and they were arrested and lodged in jail. So great is said to have been the in-lignation of the citizens of Dawson against these men that serious fears were entertained of their teing lynched. Though opposed to lawlessness in all forms, yet we do not unink we should feel pained to chronicle such an event. That they may receive the just punishment their crime deserves we sincerely trust. It is just such bloodyminded villains as these that condemn a whole community and State by these exhibitions of lerocity and bloodshed.

RAILROAD ACCIDENT NEAR TRENTON.

Yesterday morning as the quarter to nine train from Trenton to Belvidere was passing near the State Asylum a sad accident occurred, by which a man named Peter W. Davis was killed, and another, named Thomas Stout, severely injured. Thomas Stout is a farmer in Ewing township, and was coming to Trenton, with his servant, Peter W. Davis, in a wagon drawn by a horse for which Mr. Stout has refused \$375. When at the birdge near Dean's farm, on the Asylum road, they attempted to cross, supposing the up train had passed, when they were caught. The carriage was smashed all to pieces and the horse thrown into the feeder of the canal and drowned. Peter Davis was killed and thrown into the water. Mr. Stout was severely injured about the shoulders, but tried to get Davis out of the water. As soon as the excitement was over Mr. Stout found that his own injuries were great. An inquest was held yesterday before Coroner Degraw, at the Metropolitan Hotel, Trenton, when a recommendation that a fagman should be appointed to attend at the bridge.

SCANDAL IN THE "LAND OF STEADY HABITS."-SCANDAL IN THE "LAND OF STEADY HABITS."—Hartford is scandalized over a matrimonial infelicity. The case referred to is that of Dr. George S. Green, a leading homospathic physician, who is trying to get a divorce from his wife, who, he alteges, is guilty of habitual intemperance, intoicrable cruelty and "general misconduct." The sympathiles of the community are with the wife. Her nearest neighbors, while admitting that she is, perhaps, a little "high strung," are astonished that the doctor should base his application on such strong grounds. Mrs. Green is a second wife and by her the doctor has had four children. She proposes to contest the suit to the bitter end and declines all compromises, though she would be willing to separate if she could have the care of her children and have support provided for her. The doctor says he has no property to make over to her; that all he has is invested in his residence, which is valued at \$20,000, and is one-half mortgaged at that. The case will come up in December, when developments of the most sensational character are promised.

A Longevity.—Mrs. Plank, of Killingly, Conn., claims to be the oldest lady in the United States who retains full possession of her faculties. Sho was born on the 20th of October, 1765, and has a vivid recollection of very many important events in the history of the republic. Her father, John Graves, was a seldier of the Revolution. Mrs. Plank is probably the only centenarian in this country who does not claim the honor of having been on terms of intimacy with George Washington.
